Combination Crown System .....	97
Massive Crown System ..	98

The logo for FYPON, featuring the word "FYPON" in a bold, black, serif font. A blue wave-like graphic element is positioned above the letter "Y".

## Go with the Flow E-Vent™ Systems

Leave it to Fypon to make functional products totally beautiful. Fypon® E-Vent systems, our specially designed eave ventilation system, provide needed attic ventilation while still allowing you to maintain the architectural style and beauty of the home's exterior structure. Behind an attractive moulding profile, each E-Vent system features a corrosion-resistant screen that helps keep insects out while allowing maximum airflow. Originally created to meet the needs of houses with steeply pitched roofs, E-Vent remains a popular choice for many different architectural styles. In new construction, E-Vent may eliminate the need to extend the soffit overhang, as well as the associated materials, accessories and labor required for installation. It may also downsize truss tails, thus reducing the amount of shingles and roof sheathing. **For installation instructions, please visit [www.fypon.com](http://www.fypon.com).**

Products shown: EV580, 7" Balustrade System / Rosedale Balusters, Window Crossette System, NP8X48, PST10X10F, B5X7, DMST7X69

## How to Use This Section

The products in this section of the catalog are organized by system. Once you determine the system style desired, you can find all the parts and accessories needed to complete that system conveniently grouped together.

## How to Order

### E-Vent™ Systems\*\*

Your first step when ordering an E-Vent system is to determine the style you want. Next, determine how much product you need. Most building codes require a net free-ventilating area equal to 1/300 of the total area to be ventilated. Half of the ventilation is to be provided in the upper portion of the space to be ventilated with the balance provided by eave or cornice vents.

### E-Vent™ Accessories

The accessories shown here are available to make E-Vent system installations quick and easy. All E-Vent accessories are unattached and must be ordered separately.

#### Table & Blade Angles

For recommended table and blade angles for mitering 90° corners, please visit [www.fypon.com](http://www.fypon.com).

#### Remember to Order Adhesive

A urethane-based adhesive **must** be used on all joint surfaces. See page 190 to order Loctite® PL Premium® Adhesive.\*

#### Joining Block / End Cap

- Butts right to the end of the E-Vent moulding profile for a neat, professional look
- Protrudes slightly from trim profile

#### Mitered Outside Corner

- Mitered 45° two-piece left and right sections for field joining
- Allows you to install those outside corners fast

#### Mitered Inside Corner

- Mitered 45° two-piece left and right sections for easy, on-the-job accuracy
- Save time and money

#### Filler Block

- Used as a support filler block if field trimming is required and additional support is needed at the end of the moulding
- Two are shipped with each 12' moulding

### Custom Products

To request a unique custom product design, please contact the Fypon Custom Product Sales Department at 855.397.6647. You may also fill out our Quote Request Form, which can be obtained at [www.fypon.com/products/custom.asp](http://www.fypon.com/products/custom.asp), or contact the Fypon Customer Service Department at 800.446.3040.
