Pages 24-33

PVC Trim

PVC Boards & Sheets
PVC Trim Profiles
PVC Trellis Systems

In This Edition ...

Welcome to the Fypon® 2013 PVC Catalog, featuring our full range of PVC products. We hope you will find that the following enhancements make it easier for you to use this book to specify, source and sell Fypon PVC products:

- New product offerings have been added to this catalog, including colonial and recessed panel posts, glass rail kits, and sealed edge trim boards. A new wood grain option for PVC trim has also been introduced.
- Easy-to-access details put more product options at your fingertips.
- Expanded product charts feature product images, dimensional data and part numbers. See the introduction to each section for details on how products are organized.
- Consistent groupings within each section make it easier to find matching accessories, where applicable.

Please visit www.fypon.com for additional resources, including installation instructions.

Fypon® PVC Products

Put Us to Work for You

Fypon is the leading brand of decorative millwork.* With synthetic solutions for virtually every millwork and trim project, you can put Fypon® products to work for you. Our PVC column wraps, railing systems and trim profiles, boards and sheets deliver an authentic wood appearance – without the hassles of some traditional building materials.

Fypon PVC products provide superior performance over many other materials, given their inherent properties. PVC is a closed-cell product, making it resistant to moisture and insects. It also resists rotting, warping, cracking, chipping and peeling.

Fypon PVC is virtually maintenance-free. The surface has a consistent quality and finish that never needs painting – no sanding, priming or sealing.** And PVC is lightweight, making the product easy to work with.

For even greater peace-of-mind, we stand behind all of our products with a limited lifetime warranty for homeowners.***

*Builder Magazine "2012 Brand Use Study"

**PVC Trim may be painted, if desired, but it is not required. When painting PVC, a paint that has a Light Reflectance Value (LRV) of 55% or higher must be used.

***For complete details on our warranty, visit www.fypon.com.

Smart, Stylish Solutions From Porch to Profile

Fypon® PVC products deliver outstanding features and benefits from porch to profile:

- The look and feel of traditional building materials with less maintenance
- Resists moisture and insects, as well as rotting, warping, cracking, chipping and peeling
- Never needs painting, but may be painted to achieve desired color – no sanding, priming or sealing*
- A variety of sizes and styles, ready to use and easy to work with
- All products backed by a limited lifetime warranty for homeowners

Lowering the Total Cost of Ownership

Fypon® PVC products provide superior performance over many traditional materials, given their inherent properties. In addition, many of our PVC products are designed for easy project planning, assembly and installation. This combination of benefits helps to provide a lower total cost of ownership than wood and other alternatives. For even greater peace-of-mind, we stand behind our products with a limited lifetime warranty. **For complete details on our warranty, visit www.fypon.com.**

The Right Product for the Right Application

With the performance that Fypon synthetic millwork and trim provides, we have the perfect material for any project. The characteristics of PVC – found in the following pages – make it well-suited for straight lengths of trim, milling and use at building grade. See the Material Comparison chart on page 34.

* PVC Trim may be painted, if desired, but it is not required. When painting PVC, a paint that has a Light Reflectance Value (LRV) of 55% or higher must be used.

Column Wraps

- Constructed from stable, high-density cellular PVC
- Labor-saving two-piece design installs easily around an existing structural support
- Installation cleats on exterior of column shaft allow for flexible positioning
- Optional cap and base styles available to achieve desired effect
- Complete kits for easy ordering

QuickRail® Systems*

- Multi-layer extrusion technology provides excellent strength and resiliency
- White or tan UV-protected finish resists fading and never needs painting*
- Concealed fasteners for a professional, finished look
- Complete kits for easy ordering
- International Building Code and International Residential Code compliant when properly installed (ICC-ES Evaluation Report ESR-2601)**

PVC Trim***

- Constructed from stable, high-density cellular PVC
- High-density cell structure and consistent, solid-white core perfect for fabrication
- Gluing with cellular PVC adhesive forms a molecular bond, literally creating one piece
- Boards and sheets in a variety of sizes and lengths, as well as bead board and corner boards
- Boards and sheets available in smooth (smooth on both sides) or woodgrain textures (woodgrain on one side, smooth on one side)
- Trim profiles available in 21 different styles

* QuickRail® products should never be painted; to do so will void the product's limited warranty.

** Always consult the local building code authority to determine suitability of products to meet specific project requirements.

*** PVC Trim may be painted, if desired, but it is not required. When painting PVC, a paint that has a Light Reflectance Value (LRV) of 55% or higher must be used.

Better Products. Better Service.

At Fypon, our goal is to provide you with the performance, the product and the service you expect from the leader in synthetic millwork. With our wide product selection, unsurpassed quality and dedication to customer service, you can trust us as the superior solution for all of your millwork and trim needs.
